**INVESTIGATIVE LEAD SUMMARY**

INCIDENT DATE: JUL 20, 2021  
 CITY / ZONE: [REDACTED]  
 REPORT DATE: JUL 20, 2021 15:18:49  
 REQUESTED BY: SUPPORT@SHOTSPOTTER.COM

**INDIVIDUAL SHOTS**

The following shot count, times, and locations were automatically calculated by the ShotSpotter system at the time of detection. They are approximate and should be deemed as such. The number of individual shots below may not match the round count reported on page one if an Incident Reviewer adjusted the round count during incident review prior to publication. Some shots may overlap or hide other shots on the map.

SHOT	DATE	TIME	INTERVAL (sec)	LOCATION
# 1	07/20/2021	03:07:16.668	0.000	3 [REDACTED], -7 [REDACTED]
# 2	07/20/2021	03:07:16.723	0.055	3 [REDACTED], -7 [REDACTED]
# 3	07/20/2021	03:07:16.817	0.094	3 [REDACTED], -7 [REDACTED]
# 4	07/20/2021	03:07:18.234	1.417	3 [REDACTED], -7 [REDACTED]

**DISCLAIMER**

The Investigative Lead Summary is produced using data automatically generated by the ShotSpotter system and has not been independently reviewed by our Forensic Engineers. Although it provides precise trigger-pull location and timing as determined automatically by the ShotSpotter system, this summary should only be used for initial investigative purposes because the shot timing, location, and count could differ once reviewed by a ShotSpotter Forensic Engineer. Factors, such as obstructed or attenuated muzzle blast, weapon discharge in an enclosed space, or if the weapon discharged is of .25 or smaller caliber, may prevent the sensor(s) from detecting all or some of the shots fired. This summary has been generated solely for the purpose for which it is provided. Nothing herein shall to any extent substitute for the independent investigation of the shooting incident. The data and conclusions herein should be corroborated with other evidentiary sources such as recovered shell casings and witness statements.

**ABOUT SHOTSPOTTER**

ShotSpotter uses strategically placed acoustic sensors to detect and locate gunshots within a coverage area. The locations of the gunshots are calculated using audio pulse data and multilateration. Machine learning algorithms analyze and classify the sounds before they are reviewed by acoustic experts at the Incident Review Center. Within seconds, Incident Reviewers add relevant tactical intelligence and publish confirmed gunshots to ShotSpotter subscribers. Learn more about the ShotSpotter technology at [ShotSpotter.com/technology](http://ShotSpotter.com/technology).
