Antitrust Litigation

Edgeworth's experts have deep experience analyzing economic issues in the pharmaceutical industry in the areas of antitrust, intellectual property, commercial damages, and consumer protection. Since our founding in 2009, Edgeworth's economists have served as both testifying and consulting economists on a wide array of industry-specific matters before courts and regulatory authorities.

Our pharmaceutical economics experts have assisted clients across the industry, including brand and generic pharmaceutical companies, biotechnology companies, product manufacturers, healthcare providers, and insurers. We have performed analysis and testified in a variety of cases on issues including class certification, antitrust liability, antitrust damages, patent infringement, and product liability. In these contexts, Edgeworth experts have assessed economic and econometric issues in the pharmaceutical industry relating to:

- Pay for Delay
- Product Hopping
- Price Fixing
- Bid Rigging
- Exclusive Contracting
- Consumer Protection
- False Advertising
- Intellectual Property Damages
- Valuation
- Contract Disputes
