PRACTICE AREAS

Class Certification
Antitrust & Competition
Damages
Antitrust Litigation

EDUCATION

Dr. Nguyen earned her PhD and MA in economics from Stanford University. She earned her BS, *summa cum laude*, in economics and mathematics from Bates College.

Dr. Tram Nguyen specializes in quantitative economic analysis and modeling within the context of labor and employment discrimination matters, industrial organization, and firm management. She has extensive experience analyzing large and varied datasets, as well as expertise in machine learning and statistical tools.

Dr. Nguyen has provided support to clients on issues related to the economics of class certification for both direct and indirect purchaser classes and applying rigorous econometric analyses in estimating antitrust damages in dozens of matters. Her casework spans a broad range of industries, including agricultural products, railroads, chemicals, pharmaceuticals, and consumer products. Across these fields, Dr. Nguyen has extensive experience in leading teams of consultants to conduct empirical analysis of economic issues and present analytical insights in expert reports.

Dr. Nguyen's academic research focused on issues of labor and employment in developing countries. In her dissertation, Dr. Nguyen analyzes the effects of a sector-specific minimum wage on wages in other sectors by examining the garment industry in Cambodia. During her undergraduate and graduate studies, she was awarded several research grants, excellent teaching recognitions, and academic prizes.

PREVIOUS EXPERIENCE

- Research Assistant, Federal Reserve Bank of Boston
